## 8<sup>th</sup> Grade Science-Uddo Element, compound, mixture foldable Instructions

- 1.) Fold the paper in half, hamburger style. Then fold the paper into third. When you are done, if you unfold the paper, you should have six sections as seen in the diagram at the right
- 2.) Use scissors to cut the folds on the front flap, as shown in the diagram to the left, represented by the dotted lines.
- 3.) Once cut, close the foldable. Paste the category labels from the document that has the information. Paste each category title on the front element, compound, mixture
- 4.) Determine which pictures and examples describe each of the categories in number three. These should be pasted on the outside flap. (See diagram below)
- 5.) Determine which boxes contain information for each of the categories (element, compound and mixture).
- 6.) Paste them inside the foldable in the appropriate category.
- 7.) Answer the two questions on the inside of the foldable at the bottom in complete sentences.
